PROFESSIONAL SUMMARY

Innovative Android developer with 7+ years of experience designing, building and optimizing mobile applications across various platforms including **Android Mobile**, **Automotive OS**, and **Android TV**. Skilled in **Kotlin**, **Core Java**, **Jetpack Compose** and **KMP/CMP** with proven success in delivering scalable, high-performance apps for global clients. Adaptive to the use of **AI-driven** solutions to improve code quality, automate unit testing, and streamline dependency analysis. Recognized for cross-functional collaboration, technical leadership, and driving impactful user experiences in fast-paced, agile environments.

WORK EXPERIENCE

Tech Mahindra Limited – Senior Software Engineer

Nov 2025 – Present

- Delivered self-serve and Wi-Fi optimization features across **MyBell Mobile**, **Lucky Mobile My Account**, **Virgin Plus My Account**, and **My PC Mobile (Prepaid)**, collaborating cross-functionally and integrating external APIs with in-house libraries (**NMF-UI**, **NMF-Chat**, **NMF-Analytics**, **NMF-NPS**).
- Built and leveraged **AI agents** to automate unit testing, boost code coverage, and streamline dependency analysis for version upgrades.
- Applied AI-assisted solutions to resolve **SonarQube issues** (cognitive complexity, function parameters), improving code quality and maintainability.
- Contributed to release activities, Agile sprints, code reviews, debugging, and feasibility studies, ensuring smooth deployments and robust performance.
- **Key Projects:**
 - * **My Bell Mobile**
 - The award-winning MyBell app lets customers manage all their Bell services anytime, anywhere, with an intuitive design that enables quick access to Mobility usage, TV programming changes, travel options, and device upgrades.
 - * **Lucky Mobile My Account**
 - Manage your Lucky Mobile services right from your phone, on the Lucky Mobile network and on any Wi-Fi network. Using the app does not require data –you do however need data or a Wi-Fi connection to download the app.
 - * **My PC mobile (Prepaid)**
 - The My PC Mobile app makes it easy to manage prepaid services anytime, anywhere, with a refreshed design and free access over 3G, 4G, and LTE networks without using your data plan.
 - * **Virgin Plus My Account**
 - The My Account app lets you manage your account 24/7 from your phone. Pay your bill, check your usage, grab a travel pass and so much more.

TO THE NEW – Senior Software Engineer

Aug 2022 – Nov 2025

- Designed and developed new features for Android TV and Automotive projects, ensuring scalability and performance.
- Built custom UI components optimized for DPAD navigation and large-screen experiences.

- Delivered Android features for global clients across domains like OTT, media, and automotive.
- **Key Projects:**
 - * **Astro GO (Android TV)**
 - Adapted mobile-first design for Android TV with DPAD navigation.
 - Integrated playback for 100+ channels and 110,000+ VOD assets.
 - Implemented user profiles with cross-device synchronization across Astro Box, mobile, and TV.
 - Enhanced search features (title, actor, director, channel) optimized for remote input.
 - Optimized startup latency, memory usage, and Leanback compliance for smooth UX.
 - * **Tata Play Binge (Automotive OS)**
 - Supported OTT aggregation app with 30+ integrated platforms on Android Automotive OS.
 - Delivered live TV, VOD, universal search, personalized recommendations, and watchlist features.
 - Ensured seamless playback continuity across devices (mobile, web, automotive).
 - Handled bug fixes, sprint tickets, and testing features in Jira agile environment.
 - * **Mutualink LNK 360**
 - Built secure multimedia PTT platform supporting voice, video, and data communication.
 - Integrated **WebRTC** for live audio/video and **Google Maps** for real-time location sharing.
 - Enabled cross-agency communication with video, location sharing, and situational awareness.
 - Contributed to sprint tickets, testing, and delivery cycles in agile model.

Mobcoder LLC – SDE 2

Mar 2020 – Jul 2022

- Created scalable Android apps with Kotlin and MVVM architecture.
- Integrated payment gateways and real-time communication modules.
- **Key Projects:**
 - * **CricRadio**
 - Built cricket app with live commentary, superfast scores, and real-time updates via sockets.
 - Developed speech commentary in multiple languages, floating PIN views, and live chat.
 - Implemented graphs (run rate, wagon wheel, partnerships, odds) using MP Chart.
 - Added live animations and ball delivery status for engaging UX.
 - * **Xagon UPSC Flashcards**
 - Developed UPSC learning app with flashcard-based revision and gamified UI.
 - Integrated Google login (OAuth 2.0) and Razorpay payment gateway.
 - Built interactive card flip and swipe animations for engaging study experience.
 - Managed requirements gathering, testing, and end-to-end delivery.

WebMobril Technologies – Android Developer

May 2019 – Feb 2020

- Built Android apps from scratch including REST API integration and social logins.
- **Key Projects:**
 - * **TM Driver / TacoMar**
 - Built food ordering and driver apps with real-time GPS tracking for drivers.
 - Integrated Stripe and Braintree payments for seamless checkout.
 - Developed Google login and order management workflows.
 - Improved UI/UX for intuitive ordering and delivery tracking.
 - * **Droom - Shoppers Community**
 - Created shopping community app with product reviews and social features.
 - Integrated Authorize.net payment gateway and Google login.
 - Improved UI/UX with modern layouts for enhanced engagement.

ACHIEVEMENTS & RECOGNITION

- **Star Performer of the Month** – May 2025
- **Star Performer of the Month** – Mar 2025
- **Team Award (Fastest Growing Team)** – Feb 2023
- **Client Visit (Tata Motors, Pune)** – Onsite testing of Android Automotive app on real car infotainment system and client interaction (1 week).

TECHNICAL SKILLS

Programming Languages	Kotlin, Core Java
Mobile Platforms	Android, Automotive OS, Android TV
Frameworks	Android SDK, Jetpack Compose, Kotlin Multiplatform (KMP/CMP), MVVM, MVI, MVP, MVC, Clean Architecture, SOLID, OOPS
Databases	RoomDB, SQLite
Version Control	GitLab, Bitbucket, GitHub
CI/CD Tools	Jenkins, Automation Build Generation & Versioning
Operating Systems	macOS, Ubuntu, Windows
Development Tools	Android Studio, Gradle
Testing	Unit Testing, JUnit, Mockito, Robolectric
Payment Gateways	Cashfree, Stripe, PayPal (Braintree SDK), RazorPay
APIs & Services	REST, JSON, Google Location APIs, Firebase Notifications, Google Play Services
Others	Retrofit, LiveData, Crashlytics, Push Notifications, Socket.IO, Analytics, DTM, App Profiling & Monitoring, Safe Agile Framework, Social Login

CERTIFICATIONS

- ChatGPT and GPT-4 LLM Guide - Prompt Engineering for Everyone (Udemy, Sep 2025)
- Advance Android Bootcamp 2023 (Udemy, Aug 2023)
- Android Unit Testing and TDD (Udemy, Jul 2023)
- Flutter App Development (Udemy, Nov 2022)
- Android Development From Scratch (Udemy, Aug 2018)
